Summary

As a final-year IT student at Ho Chi Minh City University of Education, I specialize in building full-stack web applications using JavaScript/TypeScript with React, Next.js, and Node.js. My experience includes developing an event management app with chatbot integration at Bosch and creating innovative solutions like Viquim AI's e-commerce platform and Smart Nutrition's AI-driven health app. Honored with awards for research and a published paper in the *Asian Journal of Research in Computer Science*, I am driven to deliver high-impact, user-focused technology through collaboration and creativity.

Technical Skills

- **Languages:** JavaScript, TypeScript, Java, Python, C#, C++
- **Libraries & Frameworks:** React, React Native, Next.js, Node.js, Express.js, Socket.IO, Tailwind CSS
- **Tools:** MS SQL Server, Docker, Git, GitHub Actions, AWS, Azure, Jira
- **Competencies:** REST API Development, Agile Development, OOP, System Design
- **Languages:** English (IELTS 6.5), Vietnamese (Native)

Experience

Frontend Intern, Bosch Global Software Vietnam

Jul 2025 – Jan 2026, Ho Chi Minh City

1. App for Managing Events and News

Frontend Developer

- **Description:** Developing a web application with a CMS for managing events and news and a user-facing website, integrated with chatbot functionality for enhanced interaction and designed for responsiveness.
- **Responsibilities:**
 - Decided the tech stack to optimize development and performance.
 - Designed the user interface, ensuring alignment with Bosch's design standards.
 - Built a responsive web application using React and Tailwind CSS.
 - Worked with Node.js backend services and integrated APIs for application features.
 - Implemented Single Sign-On (SSO) authentication using Azure.
 - Worked in an Agile environment, using Jira for task and source tracking.
- **Tech Stack:** React, Vite, Redux Toolkit, Axios, Tailwind CSS, Motiff, Node.js, Moleculer

Freelance Projects

2023 – 2025

1. Viquim AI

Frontend Developer (Team of 3, Production)

- **Production URL:** viquimproduction.vercel.app
- **Description:** Website enabling sellers to create chatbots for their websites, TikTok, or Facebook Fanpages, automating sales, product recommendations, and order tracking.
- **Responsibilities:**
 - Designed user-friendly interfaces in Figma, optimizing for sales automation.
 - Developed the frontend from scratch using Next.js and Tailwind CSS, ensuring responsiveness.
 - Created a JavaScript embed code for seamless chatbot integration into third-party websites.

- **Tech Stack:** Next.js, TypeScript, Tailwind CSS, Figma, NextAuth, Redux Toolkit, Axios

2. Skye Education

Frontend Developer (Team of 3, Production)

- **Production URL:** skyeeducation.com
- **Description:** Platform connecting tutors and students for booking, with resources and blogs on math and diverse educational content.
- **Responsibilities:**
 - Designed user interfaces in Figma, optimizing for user engagement.
 - Developed frontend with Next.js and Framer Motion for engaging animations.
 - Implemented secure Google sign-in with NextAuth.js and managed state with Redux Toolkit.
 - Created GitHub Actions for CI/CD pipelines and tested code with SonarQube.
 - Built Docker images, pushed to AWS ECR, and deployed using ECS.
- **Tech Stack:** Next.js, Framer Motion, Tailwind CSS, NextAuth, Redux Toolkit, Axios, Docker, AWS

University Projects, Ho Chi Minh City University of Education

2023 – 2026

1. Smart Nutrition Management Application

Frontend & AI Developer (Team of 5)

- **GitHub:** github.com/TuananhDo0308/nutrition-app-mobile
- **Description:** React Native mobile app using AI to analyze food images, identifying ingredients, quantities, and nutritional content for tracking, published in *Asian Journal of Research in Computer Science*
- **Responsibilities:**
 - Developed frontend with React Native, integrating visualized charts for nutritional data display.
 - Researched methods to estimate object mass from 2D images for accurate nutritional analysis.
- **Tech Stack:** React Native, Expo, Redux, Axios, Python

2. Real-Time Chat Application *Full-Stack JavaScript Developer (Solo)*

- **GitHub:** github.com/TuananhDo0308/chat-app-nodejs
- **Description:** A real-time chat application enabling instant messaging and live communication using Socket.IO.
- **Responsibilities:**
 - Developed a real-time chat application using Node.js, Express.js, and Vanilla JavaScript.
 - Implemented WebSocket-based communication with Socket.IO for instant messaging.
 - Built responsive chat interfaces using HTML, CSS, and Vanilla JavaScript.
- **Tech Stack:** Node.js, Express.js, Socket.IO, Vanilla JavaScript, HTML5, CSS3

Education

Bachelor of Information Technology

Ho Chi Minh City University of Education, Vietnam

2022 – Expected 2026, GPA: 3.5/4.0

Achievements

- 2nd Prize, Scientific Research Competition, Faculty of IT; Encouragement Prize, University Level; 3rd Prize, Ministry Level, HCMUE, 2025
- 2nd Runner-Up, Coderace Competition, Bosch Global Software Vietnam, 2024
- Published Paper, *Asian Journal of Research in Computer Science* (DOI: [10.9734/ajrcos/2025/v18i5650](https://doi.org/10.9734/ajrcos/2025/v18i5650)), 2025
- Building RAG Apps Using MongoDB, MongoDB, 2025 ([Certificate](#))
- MongoDB Schema Design Patterns and Anti-patterns Skill Badge, MongoDB, 2025 ([Certificate](#))
